I'm not sure how to answer that as we've been in the same meetings. They were committed to two deliverables, workplans for districts other than 4, and workplan for district 4. They kind of gave them to us although they were pretty disappointing.

Do you want me to tell him that and tell him to revise them by a certain date? Then the meeting will be to update on their progress. I don't know what to do with these people. My overall sense is that they know what they have to do they just do not have the resources to put on it.

The week of March 3rd feels like a long time from now. Are there any deliverables being worked on from our last discussion? It seems like we had asked them to do some other things. It would be nice to have a sense of specific progress they are expecting to make between now and then, otherwise it will just feel like more delay.

That's interesting, thanks Jerry.

Those afternoons actually do not look good for me (Wed) or David (Tues). I was going to suggest Friday but I think David is out. What about the week of March 3?

Hi Michele,

My trip to Santa Maria/Orcutt (D3) district office clarified the question about those 13 wells that apparently had less than 3,000 TDS. The ten wells have less than 3,000 but the injection zone used to be a waterflood zone (hydrocarbon producing) and clearly meets an exemption criteria. The 3 wells turned out to be more than 3,000 but still, the injection zone is also hydrocarbon producing. I will include these wells in the tally for hydrocarbon zone extensions.

The rest of the week for me is tight. But Tuesday/Wednesday next week in the afternoon is open. Let me know what you think. Thanks.

Jerry

Hi Jerry,

I hope your meetings with the districts went well last week.

When we met on Feb 7 we discussed planning our next meeting. Can you give me some dates to work with? Thanks!

Sincerely,

Michele
